

Gaurav Gurunath Lad

Data Science Graduate | Aspiring ML & AI Engineer

■ Virar, Mumbai, Maharashtra | GitHub: Gauravlad15

BASIC INFORMATION

Full Name: Gaurav Gurunath Lad

Age: 20 years

Location: Virar, Mumbai, Maharashtra, India

Current Status: Fresh Graduate — Actively seeking ML/AI opportunities

GitHub: Gauravlad15

EDUCATION

BSc in Data Science

University: Mumbai University

College: Viva College of Arts, Commerce and Science, Virar

Duration: 2023 – 2026

CGPA: 7.73

Masters in Data Science (Completed)

Institute: IT Vedant Institute

Status: Completed

TECHNICAL SKILLS

Programming Languages: Python

Data Science Libraries: Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn

Deep Learning: TensorFlow, Keras, Computer Vision, Deep Learning

AI / LLM: LangChain, RAG (Retrieval Augmented Generation), FAISS, Sentence Transformers, Groq LLM

Tools: Jupyter Notebook, VS Code, Git, GitHub, Google Colab

PROJECTS

Project 1 — RAG Bot (Personal AI Assistant)

Built a complete end-to-end Retrieval Augmented Generation (RAG) based AI bot that can answer questions from PDF, CSV, and Excel files. The bot uses FAISS for vector similarity search, Sentence Transformers for embedding generation, and Groq LLM (Llama3) for answer generation. This project demonstrates a full data ingestion pipeline from document loading to intelligent response generation.

Tech Stack: LangChain, FAISS, Sentence Transformers (all-MiniLM-L6-v2), Groq LLM (Llama3), Python

Key Concepts: Data ingestion pipeline, text chunking, vector embeddings, similarity search, prompt engineering

Project 2 — ML Classification Projects

Developed multiple machine learning classification projects covering the full ML lifecycle — data preprocessing, feature engineering, model training, and performance evaluation using standard metrics.

Tech Stack: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Key Concepts: Data preprocessing, classification algorithms, model evaluation, confusion matrix, accuracy, precision, recall

Project 3 — ML Regression Projects

Built regression-based machine learning models to predict continuous outcomes. Focused on feature selection, model optimization, and evaluation using regression metrics.

Tech Stack: Scikit-learn, Pandas, NumPy

Key Concepts: Regression algorithms, feature engineering, MSE, RMSE, R-squared evaluation

EXPERIENCE

Gaurav is a fresher with 0 years of industry experience. However, he has compensated for this through strong self-learning, hands-on project building, and completing a Masters in Data Science course. He is currently focused on building a solid project portfolio that demonstrates real-world practical skills in Machine Learning and AI.

GOALS & ASPIRATIONS

Short Term: Secure a position as an ML Engineer and work on real-world machine learning systems

Long Term: Grow into an AI Engineer — building advanced AI systems and contributing to impactful AI research and products

Gaurav is passionate about the intersection of data, machine learning, and artificial intelligence. He believes in learning by doing — every project he builds is a step closer to his goal of becoming a top AI Engineer.

STRENGTHS

- High performance under dedication — when Gaurav commits time to something, he performs exceptionally well
- Strong conceptual thinking — understands topics at a deep level, not just surface knowledge
- Systematic problem solver — first assesses what is needed, then solves or learns accordingly
- Self-motivated learner — proactively gathers information and teaches himself new skills
- Active note-taker and hands-on coder — believes writing and building leads to true understanding

PROBLEM SOLVING APPROACH

Gaurav follows a structured approach to problem solving. When faced with a challenge, he first assesses what knowledge or tools are needed. If the solution is within his existing skill set, he solves it directly. If not, he enters a learning phase — gathering information, studying the concept, and then applying the knowledge to solve the problem. This approach has helped him independently build complex systems like a full RAG pipeline without being taught step-by-step.

LEARNING STYLE & WORK ETHIC

Gaurav is an active learner who does not rely on passive consumption of tutorials. He writes detailed notes while learning, codes examples himself, and builds real projects to validate his understanding. His RAG bot project is a testament to this — he learned every component (embeddings, FAISS, chunking, retrieval, LLM integration) individually, took handwritten notes, and then integrated everything into a working system. He strongly believes: 'Writing brings clarity — just reading is not enough.'

PERSONALITY & INTERESTS

- Friendly and approachable — has a great sense of humor and enjoys casual conversations
- Keeps the mood light while remaining serious and focused when work demands it
- Enjoys collaborating with peers and learning in a team environment
- Curious by nature — always exploring new tools, technologies, and ideas in the AI/ML space
